

A TREK by Dangel vehicle has significantly **improved motor skills** and **obstacle protection** when used off-road.

The vehicle **remains in two-wheel drive**. It incorporates a QUAIFE® **front limited-slip differential (LSD) as standard**, THE reference in the field: when one of the front wheels loses grip, the GL transfers some of the torque to the other wheel, enabling the vehicle to get out of the difficult situation it finds itself.

All Combo TREK by Dangel vehicles also benefit from :

- **A 110 mm rise of the vehicle** to dominate rural or forest roads, while enabling safe and comfortable driving on normal roads.

- **Sensitive parts skid plate** (engine and gearbox, tanks) to facilitate passage through difficult areas and avoid ruts, stones or other branches.

- *Standard 2 years warranty (unlimited mileage) on all Dangel parts*
- *Service intervals identical to the basic vehicle*
- *Maintenance to be carried out in your garage*
