

DANGEL reinvents 4x4

4x4 by DANGEL

4WD by Dangel: a vehicle to suit you!

Comfort & simplicity

Our new 4x4 revolutionises your driving experience by adapting instantly to changing road conditions. You no longer need to be an expert to drive a 4x4, the electronic controller takes care of everything! Combined with the automatic gearbox, you benefit from unprecedented ease of use.

Safety

With the 4WD by Dangel system, you can drive in complete safety, whatever the terrain. Whether on slippery roads, in mud, sand, snow or off-road, our 4x4 system gives you unrivalled stability and control.

Performances

The 4WD by Dangel system redefines performance standards. Thanks to its autonomous electrified rear axle and electronic control unit, you benefit from unprecedented 4x4 performance, combined with immediate responsiveness. Get ready to push back your limits and experience incomparable driving sensations.

Dangel reinvents 4x4!

The 4x4 commercial vehicle market has traditionally used the power of the vehicle's engine to distribute it between the front and rear axles. Today, Dangel is revolutionising the market: the new generation 4WD by Dangel is equipped with an electric motor at the rear, fully autonomous and without recharging. Combined with the power of the base engine, 4WD by Dangel offers you greater traction, comfort and peace of mind.

Key features:

4-wheel drive transmission

The vehicle features a 4x4 transmission with two modes and an optional rear differential lock*.

Raising the vehicle

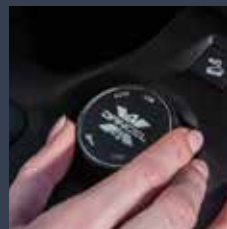

With a raised body, you can tackle the steepest slopes and dominate obstacles without fear of ruts.

Protection of sensitive parts

Because in nature, you're never safe from a rock or a stump sticking out, our vehicles come with a steel protection plate under the engine, rear axle and fuel tanks as standard.

Dangel reinvents the 'short 1st'!

The Dangel selector incorporates two new modes: in 'AUTO', the electric rear axle (4x4) is activated automatically whenever required. The 'LOW' mode amplifies the torque and force available to the rear wheels to better manage situations requiring power at low speeds. A reinvented '1st short'!

* Available in 2025

They chose Dangel:

Snow

Mountain

Sand

Forest

A responsible product range:

Our new 4WD by Dangel range reflects our commitment to corporate social responsibility (CSR):

- ▶ No CO2 impact due to electrified rear axle,
- ▶ Optimisation and a better carbon footprint by reducing the number of parts,
- ▶ Controlling energy consumption by improving our production facilities,
- ▶ All our 4WD by Dangel vehicles are converted in our production plant in Alsace.

When you choose Dangel, you're not just choosing a 4x4, you're choosing a more sustainable and responsible solution.

For 45 years, Automobiles Dangel has been driven by passion, expertise and quality, specialising in 4x4 vehicles and improving the driveability of commercial vehicles.

As a Tier 2 automotive manufacturer, we offer two- or four-wheel drive conversions tailored to the driveability needs of professionals and private customers alike.

Our partners include Peugeot, Citroën, Opel and Fiat.
